Ask The Chiropractor Ii

Chiropractic physicians are established members of the mainstream medical team. They treat problems involving the muscles, tendons, ligaments, bones, cartilage and nervous system. Chiropractic physicians can perform soft tissue therapies, prescribe corrective exercises, and safely manipulate the spine or joints to help you avoid surgery and medication.

Ask the Chiropractor - Cleveland Clinic

A doctor of chiropractic (DC), chiropractor or chiropractic physician, is an allied healthcare professional trained to diagnose and treat spinal disorders, including the body's musculoskeletal and nervous systems. DCs treat infants, children, and adults and believe in non-surgical drug-free approaches to improving whole body health.

Questions to Ask Your Chiropractor

Ideally, the chiropractor can provide adjunctive services, such as massage therapy, laser therapy, and nutritional advice, all under one roof. If these services are not available in the actual clinic, ask the chiropractor if he or she works with other professionals in these areas and if you will have help coordinating your care.

Chiropractic adjustment, also referred to as spinal manipulation, is a recognized and popular pain relief treatment for many types of lower back pain, sciatica, and neck pain.This article explains what patients can expect during their first chiropractic consultation, which typically:

What to Expect at the First Chiropractic Consultation

The Activator Method Chiropractic Technique is a diagnostic and treatment system used by some chiropractors to treat many types of back pain, neck pain, and headaches (both chronic and migraine).

Activator Method Chiropractic Technique

Chiropractors generally use an Activator instrument to perform a spinal adjustment. But, there are two major schools of thought when it comes to determining why a person needs a spinal adjustment. Chiropractic is based on the principle that spinal joint dysfunction interferes with the nervous system.

Does That Activator Thing Really Work?

Chiropractic adjustment is a procedure in which trained specialists (chiropractors) use their hands or a small instrument to apply a controlled, sudden force to a spinal joint. The goal of this procedure, also known as spinal manipulation, is to improve spinal motion and improve your body's physical function.

Chiropractic adjustment - Mayo Clinic
