Materials Needed - ROCK CANDY LAB EXPERIMENT

It's harder to squeeze the clothespin later in the lab because, as you keep squeezing the clothespin, your hand is taking away oxygen. This causes your hand to build up a waste called lactic acid that causes your hand to lose energy.-Alasca Wilson It became harder to squeeze the clothespin because we began using anaerobic respiration.

Class Blog! - Weebly

The Muscular System Tour Lab Your muscles need Glycogen (muscle sugar) in order to function. When the glycogen is broken down into energy for the muscles a waste product called lactic acid is produced. A buildup of lactic acid decreases the muscles' ability to contract and Muscle Fatigue sets in. Do this: 1. Hold a clothespin between your
