In this introduction to coding, program a rover to explore the surface of Mars. Start by using tiles to create simple programs involving moving forward or backward, turns, jumps, loops, and picking up rock samples. Then use text instructions to optimize your code. Use your skills to program the rover to complete six challenging missions on Mars.

Students can try their hand at reconstructing these relationships using the Cladograms Gizmo. In the Gizmo, students first determine which traits are shared by different organisms in a group. Students then try to create the most parsimonious cladogram, or the cladogram that would require the fewest evolutionary changes to occur.
