Geriatric Oncology Introduction Home Springer

Introduction This book is intended as a comprehensive resource for clinicians and researchers seeking in-depth information on geriatric oncology. The coverage encompasses epidemiology, the biology and (patho)physiology of aging and cancer, geriatric assessment and management, hematologic malignancies, solid tumors, issues in patient care, and research methods.

Geriatric Oncology - Springer

Typically, however, general oncology clinical trials address only a selected healthier and younger population of patients. Geriatric oncology is the area of oncology that addresses these issues but while a wealth of knowledge has been accumulated, information is often difficult to retrieve or insufficiently detailed.

Geriatric Oncology: Introduction E-mail: lichtmas@mskcc.org Springer Science+Business Media, LLC 2009 There is increased recognition that oncology is morbidity. A very major cancer load will persist rapidly becoming a field which will be primarily well into the 21st century, even if the attempts at concerned with the care of older patients.

Geriatric Oncology: Introduction, Current Treatment ...

The second edition of this engaging text reflects a welcome new paradigm for aging—that of aging as a positive stage of life. Written for undergraduate and masters-level students, it provides an interdisciplinary perspective on the wide variety of subject areas within gerontology, and combines research with engrossing narratives, new trends, and controversial topics.

Introduction to Aging, Second Edition - Springer Publishing

GERIATRIC ONCOLOGY Chronological age vs. functional age
What does being elderly mean? Elderly is a subjective cultural concept that varies from culture to culture, depending on a mixture of health-related, social and economic factors In industrialised societies, 70 years old is a standard cut-off point used to define elderly; however, in other, poorer or more traditional societies, a lower

GERIATRIC ONCOLOGY

If the latter is true, then the epidemiology of geriatric oncology could be a powerful tool in the development of genetic epidemiology, as tools such as human genome mapping become more widely available. We could develop studies of familial cancer resistance syndromes as a counterpart to familial cancer syndromes.
