region to low-carbon growth while addressing complex environmental, social and economic issues. Financial sustainability is the bedrock of all other forms of sustainability—and a mandatory part of the equation.

Holistic Approach to Sustainable Development - IIX ...

A whole-school approach to ESD calls for sustainable development to be integrated throughout the formal sector curriculum in a holistic manner, rather than being taught on a stand alone basis. This philosophy supports the notion that ESD is education for sustainable development rather than education about sustainable development. In practice, this approach means that a school will incorporate teaching and learning for sustainable development not only through aspects of the curriculum, but ...
