After all, especially when designing around common tasks, the best interface is no interface. Another example. A few companies, including Google, have built smartphone apps that allow customers to pay merchants using NFC.

### The best interface is no interface - Cooper

Wireless keypads made us lazier in that we no longer had to raise our hand and often, we did not even care to raise our eyebrows and see what is the question on the screen - we simply pushed a button and the requirement to participate was fulfilled. But since then, smartphones, tablets and audience polling apps took over our events and meetings.
