Tv Production Manual

Television Production Handbook. The original Television Production Handbook was written to help people use both field and studio television production facilities to communicate over public and government access cable television channels. It has become clear over the years (as it should have been in the beginning) that lighting is the same for painters as it is for still photographers as it is ...

Television Production Handbook

Television Production Manual iii INTRODUCTION There are essentially two ways of doing television. Programs are shot either in a specially designed television studio using several cameras which are fed into a control room and assembled in "real time," or they are shot using a single camera on location and assembled later in an editing room or on a computer.

Jackpot! The network has green-lighted (said yes to) the show concept we followed in How Writing a TV Show Works and How Getting Your Show on TV Works. Now it's time to shoot the pilot episode. A pilot is the first episode of a show -- they're shot, fittingly, during pilot season, between January and May. If the network likes the pilot, it will pick up the show for the season and make it a series.
