...

Diabetes Symptoms. The following symptoms of diabetes are typical. However, some people with type 2 diabetes have symptoms so mild that they go unnoticed. Common symptoms of diabetes: Urinating often; Feeling very thirsty; Feeling very hungry—even though you are eating; Extreme fatigue; Blurry vision; Cuts/bruises that are slow to heal

## **Type 2 Diabetes - Symptoms | ADA**

If you have type 2 diabetes, cells don't respond normally to insulin; this is called insulin resistance. Your pancreas makes more insulin to try to get cells to respond. Eventually your pancreas can't keep up, and your blood sugar rises, setting the stage for prediabetes and type 2 diabetes.

## **Type 2 Diabetes | Basics | Diabetes | CDC**

Before people develop type 2 diabetes, they almost always have "prediabetes" — blood sugar levels that are higher than normal but not yet high enough to be diagnosed as diabetes. Doctors sometimes refer to prediabetes as impaired glucose tolerance (IGT) or impaired fasting glucose (IFG), depending on what test was used when it was detected.

## **Diagnosis | ADA - American Diabetes Association**

Though type 2 diabetes most often develops in adults, children also can develop type 2 diabetes. Experts recommend testing children between the ages of 10 and 18 who are overweight or obese and have at least two other risk factors for developing diabetes.
