Vision 2050 is a roadmap for a viable future for Europe's refineries, but it is not a simple way forward. The vision is ambitious, as FuelsEurope – a division of the European Petroleum Refiners Association – is quick to acknowledge. Yet it is vital to Europe's energy independence, the environment and the economy.

Vision 2050 | SpringerLink

The last decade has shown that by working together with a common purpose, change is possible. Vision 2050 is not a roadmap to the future. Flexibility and openness to change will mark the way forward. Instead, Vision 2050 is a challenge to all aviation stakeholders – to unite in articulating and delivering a dynamic vision

Vision 2050

In 2011, the European Commission put forward a roadmap for a competitive low-carbon Europe by 2050. The roadmap presented possible action up to 2050 which could enable the EU to deliver greenhouse gas reductions in line with the 80 to 95% target agreed internationally in the context of necessary reductions by developed countries as a group.

2050 long-term strategy | Climate Action

Vision 2050 had at its core the attributes of successful business planning: understand the current situation, identify the obstacles to success, and create a pathway to overcome those obstacles. The resulting conclusion was the need for a fundamental transformation of the way the world produces and consumes everything from energy...

The 21st century will be a century in which we seek qualitative richness, with the Vision 2050 as the material basis. That is, a "platinum society" that has resource self-sufficiency and resource symbiosis, and where people remain active throughout their lives and have a wide range of choices and opportunities for free participation.
